## Rotisseries Electric

### ACR 7 Intelligent

*Self-cleaning will save you at least an hour of labour every day. The Auto Clean Rotisserie is the first rotisserie that is as convenient for the operator as it is for the customer. Cleaning can be done overnight enabling the operator to attend his valuable time to customers.*

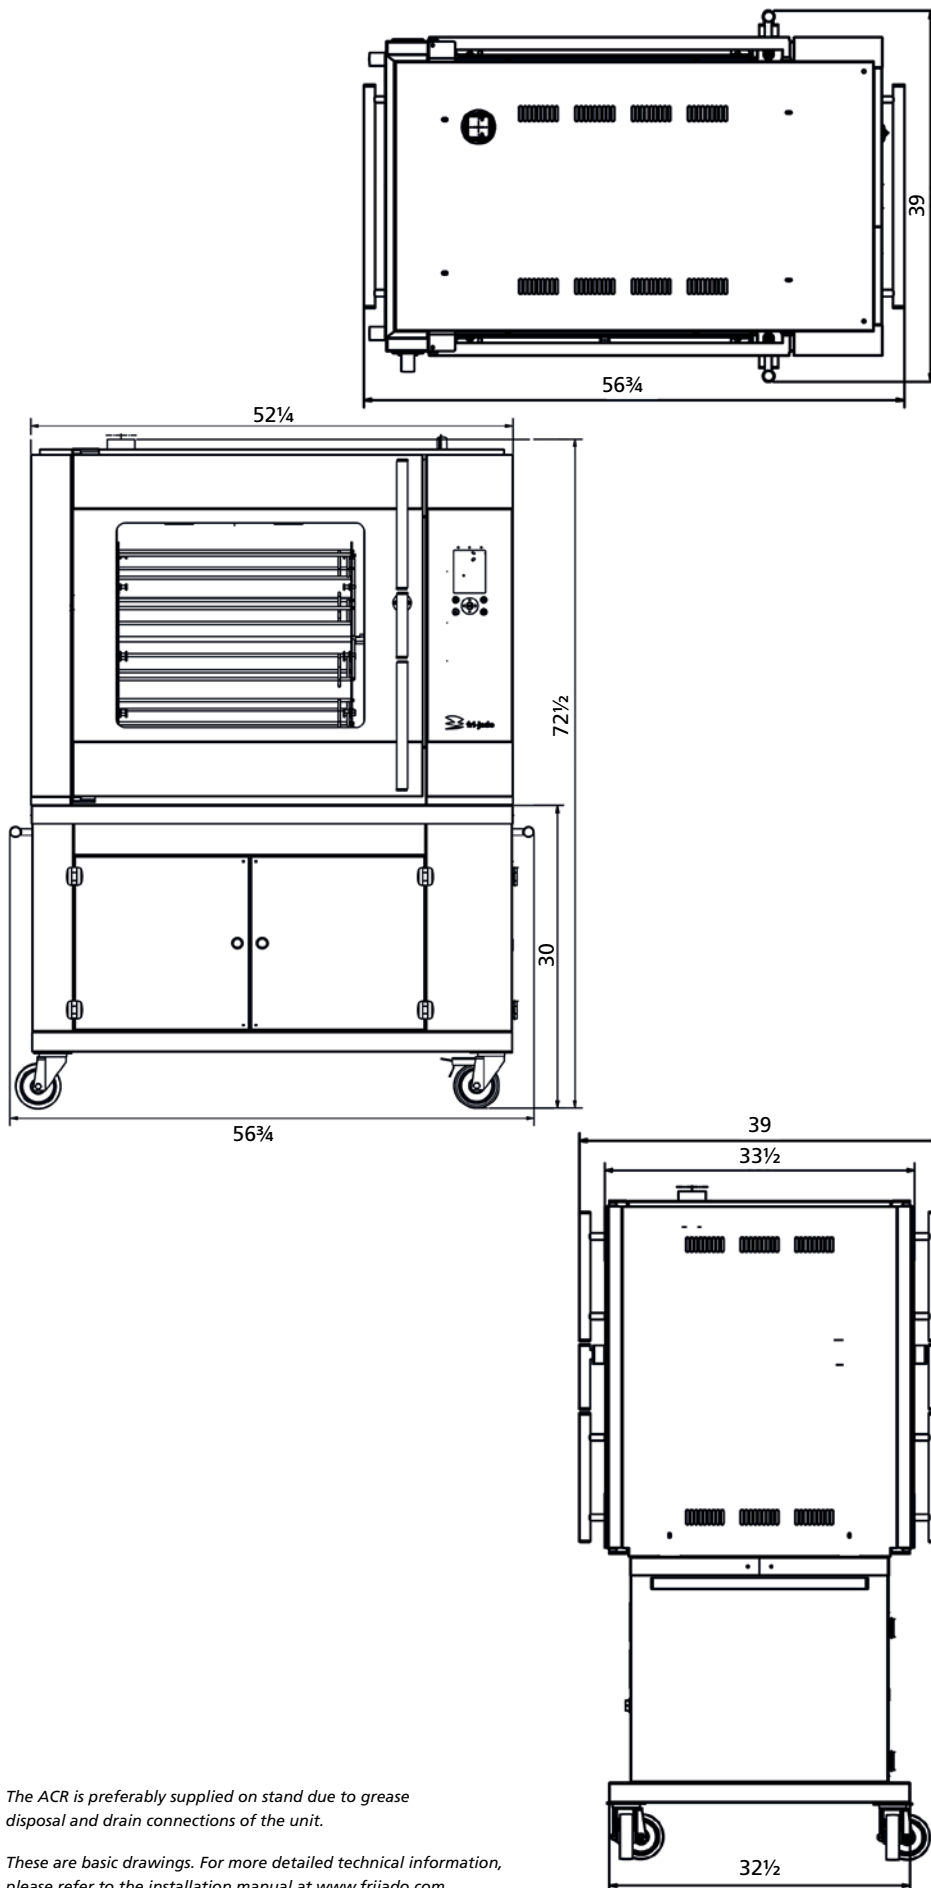

*The Cook Correction Technology corrects alterations in the cooking cycle due to half-loads, overloads, or products with a deviation in temperature. It measures abnormalities in the temperature curve and corrects the cycle automatically ensuring energy-efficient and consistent cooking.*

*The ACR is a pleasure to use. A consistent cooking cycle is guaranteed as operators are instructed in following the right grilling procedure.*

The first self-cleaning rotisserie
